Course Title: Integral Calculus 1552

Semester/Year: Fall 2025

Note:

Hi Joy, thank you for caring about us and your students so much. You're so encouraging and sincere and I feel so happy when you tell us you're proud of us. I think you should be very proud of yourself too. You make studio so fun that I look forward to it nowadays. All the small competitions and jokes you make always bring a smile to my face.

And even if I don't completely understand the topic when walking in, I always leave with a very good understanding. In high school, I did not do amazing in calculus, so I was worried coming into this class. But thanks to your help and encouragement, I was able to enjoy math and get grades I was happy with this semester. You have also made me feel more confident and believe in myself more.

I'm going to miss having you as a TA next semester. You have impacted me strongly and I'm so grateful to have been taught by you! I hope we run into each other sometimes. Good luck for the rest of your PhD! (◻`♡)
